Momon with MCC Claime

Totals: # of women who received Medicaid funded prenatal care for each risk factor category.

with MSS: # of women in each risk category who received MSS services.

Ave. MSS Units: # of units of service provided to women in each of the risk factor categories.

Ave. MSS Cost: Average amount of \$ paid by Medicaid, based on claims data, for women in each category.

Singleton LBW: This is the % of LBW infants born to women with singleton pregnancies.

Multiple gestation: The % LBW is listed next to the risk factor as a note because it represents multiple gestation.

with MSS and Risk (cumulative, unduplicated): unduplicated count of MSS women who have that risk factor and/or the ones above it. Women are counted only once regardless of the # of risk factors.

^{*} Diagnoses from claims may not be available for managed care clients, and are limited to available claims as of October 2008.
